Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Norman Hanson on 5/27/04.

The application has been amended as follows:

Claim 20: replace step (i) with the following: --

(i) an extracellular domain of an FAP α protein, the amino acid sequence of which is set forth in SEQ ID NO: 1, and --

Priority

The instant specification describes the claimed protein, at least on page 21. The general knowledge in the prior art for how to identify an extracellular domain of a membrane protein, combined with the disclosure of the instant specification describing features of the extracellular domain of FAP α , enables the claimed protein. As the specification of parent application 08/940,391 is identical to that of the instant specification, the claimed invention is both fully described and enabled as of the date of filing of 08/940,391, therefore priority for the claimed invention is granted to 10/1/1997.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art neither teaches nor fairly suggests a protein comprising the extracellular domain of FAP α and a domain of a non- FAP α protein, specifically, in a fusion or chimeric protein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 20 and 23-26 are allowed.
